Art Unit: 3662

1. The Request and Certification Under 35 U.S.C. 122(b)(2)(B)(i) is acknowledged.
2. The drawings are objected to. Boxes 104, 116, and 128, in Figures 1 and 2 must be labeled. See 37 C.F.R. 1.84.
3. The informal drawings filed August 2, 2001 are acknowledged.
4. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

✓ Claims 2-17 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

"A single antenna" and "a Global Positioning System (GPS) receiver that shares an antenna with a transceiver", as claimed, are not disclosed. What antenna is the single or shared antenna? The GPS receiver and transceiver use separate antennas. Antenna 102 is used by the transceiver and antenna 118 is used by the GPS receiver.

5. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 2-17 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

✓ As to claims 2 and 10, "a single antenna" and "a Global Positioning System (GPS) receiver that shares an antenna with a transceiver", as claimed, are misdescriptive and indefinite. What antenna is the single or shared antenna? The GPS receiver and transceiver use separate antennas. Antenna 102 is used by the transceiver and antenna 118 is used by the GPS receiver.

As to claim 8, there is no antecedent basis for "the combining circuit".

Claims 3-7, 9, and 11-17 depend from an indefinite antecedent claim.

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 10-12, as definite, rejected under 35 U.S.C. 102(e) as being anticipated by Krasner.

Krasner teaches the claimed method for reducing interference (Abstract) in a Global Positioning System (GPS) receiver (130) including transceiver (109), replicating a first transmission of the transceiver (110), coupling (117) the replicated transmission into a front end (113) of the GPS receiver, and canceling (112) the first transmission using the replicated transmission (110).

7. Claim 1 is allowed.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Theodore M. Blum whose telephone number is 703-305-1833. The examiner can normally be reached on Monday-Thursday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Thomas Tarcza can be reached on 703-306-4171.
